After numerous performances of my autobiography project "Fiktionsbescheinigung" (fictive permit), as I became legal in Europe it had no longer the impact that it had in the time that I was illegal.

this performance is an experiment.
I wanted to put my physical body in doubt.
This I use to do alone during my meditation, now I wanted to experiment the transformation that I experience in front of an audience.
of the quality of my presence in a real time in front of an audience and in correlation with the video.

I meditated parallel to the original video of "Fiktionsbescheinigung"

I confront my physical body with my energetic body,
the concrete with the esoteric,
the Socio & Geo political with the Poetic.
I have meditated in standing position using knowledge from my Chi kung practice and to experiment and energetic fields where the stamps of my previous status in Germany are taken away from my body..

previous

I call this work which is basically bio energetic and evolve from energetic fields, "waves surfing".
while meditating I gradually increase my the intensity of internal energy and the electro magnetic field that surrounds me. Connection in and out through my center, Qi, Tan tian energy point.
At a certain point I begin to alleviate above my physical body try to keep concentration on the audience in the space and keep my eyes slightly open.
